Remote Control from your Desktop

Have you ever needed to access your mobile device while you're on your computer?
Have you ever wanted to demo something on your mobile device during a presentation?
You can now control your Android device all from your computer.

Specifically designed for consumers and prosumers, SOTI Pocket Controller is tailored to provide flexible and powerful tools to manage and showcase your Android device

- Remotely access and operate your Android device's screen from your PC, in real-time
- Wirelessly view and interact with your mobile device using your mouse and keyboard
- Unleash the full power of your Android, all from your desktop

Pocket Controller remotely accesses and operates your Android device from your PC, in real-time. SOTI's Remote Control technology enables you to view and interact with your mobile device allowing you to unleash the full power of your Android device from your desktop.

Better viewing with a bigger screen

- Project your Android device's screen onto a larger display or projector, seamlessly over Bluetooth, Wi-Fi or USB
- Elevate and deliver presentations with real-time remote control access to your device's screen to fully interact, view and present

Convenience – no need to reach for your mobile device

- Remotely control your smartphone from the convenience of your desktop PC and/or laptop.
- Enhance your Android experience by using the screen and keyboard of your computer to launch apps and navigate your device
- Connect your device via Wi-Fi, Bluetooth, or USB to quickly allow you to be up and running within minutes
- Utilize SOTI's device skin to access full hardware buttons and functionality directly from your PC. No need to reach for your mobile device

Training & Presentation Tools

- Display your Android device in real-time on any display connected to your PC to create engaging and professional presentations.
- Capture screen shots and record videos, and easily share with colleagues
- Create professional training materials by printing device screenshots using SOTI's unique skin technology

Productivity Tools

- **Task Manager Tools** - View detailed information about applications and processes running on your Android device
- **File Synchronization** - Automatically or manually synchronize your data files (e.g. pictures, video files, documents, etc.) between your PC and mobile device
- **File Explorer Tool** - Browse the file system of your PC and Android device simultaneously. Transfer, view, edit and manage your files locally and remotely
- **System Information** - Monitor vital system information, such as battery levels, memory utilization, and operating system and processor information
