# Features

## Remote Control:

Use your mouse & keyboard to view and fully control your smartphone. Have a touchscreen monitor? You can now "touch" & perform gestures on the virtual screen! More than ever before, it's like having the BlackBerry in your hands.

## Training & Presentation Tools:

Display your BlackBerry in real-time on either a projector or web presentation via your PC to create efficient and professional presentations to train and educate.

## File Explorer Tool:

Browse the file system of your PC and BlackBerry simultaneously. Transfer, view, edit and manage your files locally and remotely.

## File Synchronization:

Automatically or manually synchronize your data files (e.g. pictures, video files, documents, etc.) between your PC and mobile device.

## Printing:

Create professional training materials by printing device screenshots using SOTI's unique skin technology.

## Service Books:

Monitor all of your Service Books in full detail for easy troubleshooting anytime, anywhere with your desktop PC.

## Task Manager Tool:

View detailed information about applications and processes running on your device that may be causing your device or application to misbehave.

## Screen & Video Capture:

Capture screens to compressed GIF, BMP, JPG and PNG file formats as well as record videos in WMV and AVI formats.

## System Information Tool:

Monitor vital system information, such as battery levels, memory utilization, and operating system and processor information.

## About SOTI

SOTI Inc. develops industry-leading technology that solves the unique challenges involved in deploying, managing, securing, supporting and tracking remote mobile and desktop computing devices.

Today, over 80,000 customers around the world in retail, manufacturing, healthcare, government, logistics and other industries rely on SOTI products to reduce costs by allowing them to centrally manage, secure and support their remote mobile field-forces.
